

**Charity Central presents...**  
**A new project for small and rural charities**

**Who we are**

Charity Central Essentials is a new project created to help small and rural charities that face unique challenges in complying with reporting obligations. We are one of several projects in Canada with contribution funding from the Canada Revenue Agency (CRA).

**What we do**

We plan to support small and rural charities in the prairie provinces by:

- developing resources that will enhance the awareness and capacity of boards of directors, volunteers, and staff;
- improving the access of charities to appropriate resources, information, and services; and
- fostering collaboration among charities.

**How we will do it**

We are currently developing print and electronic resources to assist small and rural charities. In particular, an "Office in a Box" will equip charities with the basic administrative infrastructure needed to comply with the *Income Tax Act*.
